<p>Document Title:</p> <p style="text-align: center;">Full Business Case CHILDRENS HOSPITAL Stage One – Children's and Women's Hospital Development</p>
<p>Action for The Board:</p> <ul style="list-style-type: none"> • To approve the business case
<p>Summary:</p> <p>The trust clinical strategy for 2012-2022 confirms the development of the Children's and Women's Hospital as a key objective of "providing a comprehensive regional hospital with outstanding outcomes" and "redesign and reconfigure our local hospital service to provide higher quality care"</p> <p>This is the full business case (FBC) for the development of the new Children's Hospital at St George's Hospital, Tooting. The scheme will result in the complete redevelopment of the 5th Floor of the Lanesborough Wing of the site, which is no longer suitable for modern healthcare delivery. The OBC for this development was approved by the Trust Board in March 2013 and by the NHS England Trust Development Authority (NTDA) in October 2013. It has been developed in line with a number of documents including the 2006 strategy for children's services, 2008 SOC for the development of the whole site, and the 2010 update to that document which concentrated on the Lanesborough Wing, and the estates strategy.</p> <p>It represents the first stage in a programme to systematically upgrade and modernise the Lanesborough Wing to create a Children's and Women's Hospital, and will be followed by similar cases for other service elements in due course. The development is anticipated to be entirely beneficial in enhancing the Trust's reputation with patients, parents, referrers and commissioners as a centre of excellence in clinical services, teaching, training and research.</p> <p>The FBC has been to a number of forums before The Board to seek views and understanding of areas that needed further clarification. For ease and assurance we have written a summary paper answering these areas. This is attached with the FBC.</p>
