

Splinting in Neurology – Advanced Course

Soft Cast and Scotch Cast

17th and 18th September 2020

*The Wolfson Neuro-Rehabilitation Centre
Queen Mary's Hospital, Roehampton*

The course is aimed at Occupational Therapists and Physiotherapists that are using soft and scotch cast in their practice for patients with neurological conditions, and have an overview of key theoretical concepts and evidence.

It will be facilitated by therapists with experience of splinting using soft cast and scotch cast material through the pathway from acute to community rehabilitation.

It will be focused on the clinical reasoning and practical application of casting in complex neurological conditions, with the use of video case studies and interactive group work.

£335 - 2 days / £195 - 1 day (Discount for block bookings)

Limited places – priority booking if attending both days

Splinting in Neurology – Advanced Skills
