

# Rehabilitation after a Central Slip Repair

## Information for patients four weeks after surgery

This leaflet explains more about returning to your everyday activities four weeks after your finger central slip tendon repair. If you have any further questions, please speak to a doctor, nurse or therapist caring for you.

### How is my tendon healing?

It is now four weeks after your tendon repair. Your tendon is now strong enough for controlled, light use but can still be damaged if over-used.

### When should I wear my splint?

A thermoplastic splint was made for you to help keep your finger(s) in a safe position after surgery.

You should now only wear the splint **at night and for protection** (e.g., on public transport and in busy places such as shops) for another two weeks.

### How should I look after my scar?

It is important to continue to massage the scar to prevent it from sticking to underlying structures and making movement difficult. Massage the scar using a water-based cream (e.g., E45, Nivea or Diprobase) in a deep circular motion for **at least 30 minutes a day**.

You can break this down into smaller chunks of time through the day if you need to do so, e.g., 10 minutes in the morning, 10 minutes at lunchtime and 10 minutes before bed.

### Will I be in pain?

Any pain after your operation should settle down over the first few months. Massaging your scar can be painful at times but please carry on as it will help you to get the best result.

### How should I be using my hand day-to-day?

You should now begin to use your hand for light, clean activities. If you are lifting objects, they should weigh **no more than one kilogram (two pounds)**.

Try to use your hand as normally as possible in light day-to-day activities such as typing, writing, eating a meal or dressing (including zips, buttons and shoelaces). Make sure you are using all the fingers and not avoiding or favouring one finger.

<b>LIGHT ACTIVITIES &lt;1 Kg</b>
<b>Personal</b>
Washing, shaving
Fastening zips, buttons
Putting on light clothes
Using fork, spoon
Combing hair
Putting on socks, tights
Tying shoelaces
Holding a plastic glass
Doing makeup
<b>Other activities</b>
Writing, signing, typing
Using a remote control
Dusting
Using the telephone, texting
Handling money
Playing cards, jigsaw puzzles

<b>MEDIUM ACTIVITIES 2-3 Kg</b>
<b>Domestic</b>
Washing up, wiping up
Using keys

Opening a new jar/bottle top / hot water bottle
Ring-pull on a can
Deodorant / aerosol spray
<b>Other activities</b>
Lifting children
Playing video / PS5 games
Using hand tools (screwdriver) / Gardening
Sports: rugby, football, swimming, golf, gym
Using power tools
Pushing a shopping trolley/buggy

## Will I need to do any specific exercises?

Your therapist will advise you on specific exercises to help regain movement and use of the finger(s). Please ensure you only exercise and use your hand as your therapist has told you.

## What else should I do and not do?

- **DO NOT** push your finger(s) into a bend with your other hand.
- **DO NOT** drive for another four weeks.

## Additional instructions

---

---

## Will I have a follow-up appointment?

You will continue to have regular appointments with the Hand Therapy team as needed.
