

Hand Exercises

This leaflet offers information about exercises for patients with hand or finger injuries under the care of the St George's Hospital hand therapy team. Please ensure that you only exercise as instructed by your therapist.

If you have any further questions or concerns, please speak to the staff member in charge of your care.

Why should I do hand exercises?

These exercises may help to reduce stiffness and increase the amount you can move your fingers. You may find your joints and muscles feel stiff or painful to begin with but as you continue with the exercises this should improve.

How often should I do my exercises?

- Repeat each exercise times.
- You should hold each position for seconds.
- These exercises should be done times per day.

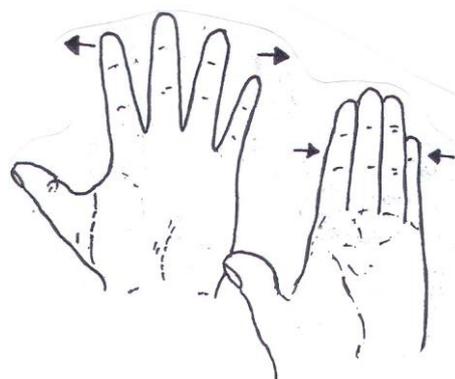

What exercises should I do?

1. Straighten

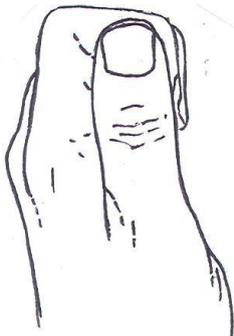

Straighten your fingers as far as possible; relax.

2. Span

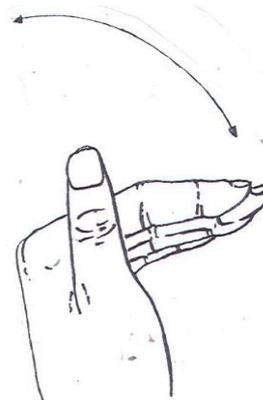

Straighten your fingers and spread them open; bring your fingers in together.

3. Hook

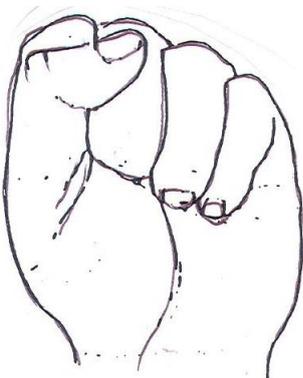

Keep the main knuckles of your fingers straight; bend the top and middle joints of each finger together.

4. Table-top

Keeping your fingers together bend the main knuckles, keeping the top and middle joints straight.

5. Full fist

Aim to make the best fist you can with your fingers; bring your fingers back to straight.
