

Splinting in Neurology

Introductory Course Soft Cast and Scotch Cast

15th and 16th June 2023

*St John's Therapy Centre
St John's Hill, Clapham Junction*

The course is aimed at Occupational Therapists and Physiotherapists that are using soft and scotch cast in their practice for patients with neurological conditions, and have an overview of key theoretical concepts and evidence.

It will be facilitated by therapists with experience of splinting using soft cast and scotch cast material through the pathway from acute to community rehabilitation.

It will cover theoretical background, clinical reasoning and practical sessions with the use of case studies.

Practical sessions include elbow, wrist and hand, knee and ankle casts.

£335 - 2 days / £195 - 1 day (Discount for block bookings)
Extremely limited places – priority booking if attending both days
