

ST GEORGE'S HOSPITAL

NHS Trust

Creating a digital collaborative wiki platform for FY1 doctors 'FYinduction.com'

Celina Pook, Rachel Carter & Souradip Mookerjee St George's Hospital, London

Aims & Objectives

1. Improve processes for FY1 doctors rotating

into new departments

- 2. Create a collaborative platform for FY1 Doctors to share a range of useful information & tips
- 3. Improve student satisfaction and confidence with rotating to new areas and fulfilling key FY1 tasks

Methods

• Baseline results of doctor's experiences with induction in St George's were collected from November 2022 - January 2023 using a survey. • The website was created using wiki.js, and pre-populated with hospital related information (useful contacts, F1 & BMA) representatives and induction documents) and preset templates for all departmental pages (e.g AMU, Gastro). • FY1 Doctors were then asked to fill a template of relevant information for their department and this was added onto the website. • Guidance on using the website was presented on 10th March at an FY1 teaching day and on 5th April at an AMU induction session.

fyinduction.com

The Intervention

- **01** A collaborative website where everyone can share information for each rotation, updated live
- **02** Includes info such as the common daily routine in the ward, usual hours, how to access important drives and relevant guidelines, how to exception report, how to manage on-calls and more
- **03** Works on computer, tablet and phone
- **04** Secure: only accessible by .stgeorges email
- **05** Can be used by FY1s, SHOs and other HCPs

• A post-intervention survey was carried out in May 2023.

Baseline results

26 doctors filled in the baseline questionnaire based on their experiences of induction in their first rotation (August-December 2022)

Key findings:

19% received guidance on HORUS/ePortfolio requirements15% received a written handover from a previous FY162% received information on how to book AL

"Well thought out and laid out. Lots of useful information"

Post-intervention results

20 doctors filled in the post-intervention questionnaire **19** department pages were filled on the website The most used departmental page: **On-Call / Post-take All** filled pages included clinical tips, day-to-day expectations and schedules, information on how to book AL and rota coordinator contacts, and key clinical guidelines **81.8%** found the website easy to use **88.9%** of doctors feel FYinduction would be a useful resource for new FY1s Average rating out of 5 for how helpful the website was: **4.1/5 (82%)**

62% had a named FY1 to shadow during the induction period81% received the name of the rota coordinator when starting their first rotation

69% were not given guidance or did not feel confident in doing a post-take shift from their induction

58% were not given guidance or did not feel confident in doing an on-call /clerking shift from their induction

46% were not given guidance or did not feel confident in how to fill in a discharge summary or TTO from their induction

Average rating out of 10 for experiences of induction into their rotation = **6.5/10 (65%)**

85% felt very confident filling in a TTO or discharge summary **70%** felt very confident with knowing what to expect from an on-call shift and **75%** for a post-take shift

Conclusion

Rotating FY1s do not receive adequate induction for starting in new departments with limited direct handover from previous FY1s. An online wiki-platform has proven to be a useful & helpful resource particularly for preparing FY1s for starting on-call shifts.
