

# LANGUAGE LINE ON WHEELS

Maternity are the first department in St George's to roll out Language Line on Wheels.

The easy to use, video translation service has access to over 240 languages including British sign language.

By recognising the needs of our parents who do not speak English as a first language, or who use sign language, it is a step in the journey to bridge the gap in health inequalities and to making our services more accessible.

To date the service has received positive feedback from staff and parents.
