

James Hope Ward

This leaflet explains about James Hope Ward. If you have any further questions, please speak to a doctor or nurse caring for you.

What is James Hope Ward?

- A day case unit with nine trolleys for cardiology procedures.
- Open 7.00am to 7.30pm Monday to Friday.
- Operates on a single sex patient allocation per bay to ensure privacy and dignity.
- A nurse led unit and runs with a Nurse Practitioner and nurses who will be responsible for your care.

Who can attend / receive the service?

This service is available to patients referred to the cardiology team.

Where do I need to go?

We are located on 1st Floor, Atkinson Morley Wing. Please take a seat on the chairs provided outside and you will be attended to by the Nurse-In-Charge when the ward opens.

Does it cost anything?

The service is free. You may incur travel costs coming to and from the hospital. If you are eligible for hospital transport, please inform the cardiac admissions team in advance to make arrangements.

How do I prepare for admission?

If you are being admitted for an elective cardiac procedure, a Nurse Practitioner will contact you for pre-assessment and instructions. Should you need clarification following pre-assessment, you may contact the ward nurse practitioners on the numbers provided.

What do I bring with me?

You may want to bring a dressing gown and pair of slippers for your comfort. We advise not to bring any valuables or to keep them to a minimum; any valuables brought in will be your own responsibility.

Please bring your current medications in original packets and up to date prescription list with you. Bring all specialist medication such as insulin and inhalers if you are due to take them during your admission. Your medications will be locked away for safety reasons.

If you are taking blood thinner: Warfarin, Rivaroxaban, Apixaban, Edoxaban or Dabigatran the Nurse Practitioner will discuss with you during pre-assessment whether they should continue or stop to avoid cancellation.

If you use a Continuous Positive Airway Pressure (CPAP) machine, please bring the machine with you, otherwise procedure maybe delayed or cancelled.

What If I am on dialysis?

You cannot have dialysis and a procedure on the same day. This will be discussed at pre-assessment with Nurse Practitioner as you may be offered a suitable date on a non-dialysis day.

What happens on the day of my procedure?

You will be allocated a trolley for the duration of your stay and will have relevant assessments such as blood pressure check, blood test and ECG before the procedure. A nurse practitioner or cardiology doctor will meet and discuss the risks and benefits of the procedure with you and, if you are happy to proceed, you will sign the consent form.

Due to emergency admissions, we cannot advise of a specific time of your investigation / procedure or any subsequent review prior to your discharge. Please be prepared to be on the ward for most of the day.

What happens after the procedure / investigation?

Most procedures will require a degree of bedrest and depending on the procedure, you may be connected to a heart monitor and will be advised of recovery and discharge time. Food and drinks will be served. It is important to keep yourself well hydrated to promote faster healing and flush out anaesthetic medications.

If any new medications were started, please do not go home until these have been explained to you. You will be sent home with a discharge letter, a copy of which will be sent to your GP electronically or by post.

Will I be allowed visitors?

Our location is adjacent to the investigation rooms hence relatives are not permitted to visit or stay. Please speak to the Nurse-In-Charge or Nurse Practitioner if you have any specific care needs, i.e. dementia, home carers or language concerns you need to discuss.

Nursing staff are happy to provide information about your progress to your Next of Kin but are not able to give out specific details over the telephone. It is advisable to have one nominated person as a main contact who can then update other relatives or family members.

Will I be allowed to drive or be fit to fly after the investigation / procedure?

On discharge, the Nurse Practitioner will discuss driving restrictions that normally vary between three to seven days depending on your procedure. DVLA imposes strict restrictions on driving after any cardiology investigation or procedure, please refer to DVLA

guidance if you need more information.

You are advised not to use public transport on the day of your procedure, please arrange for someone to collect you or other alternatives.

Fitness to fly and travel will depend on the type of investigation and subsequent results or the treatment you are having.

Contact us

If you have any questions or concerns, please contact the ward on 020 8725 1170 / 1180, Monday to Friday between 7.30am to 7.30pm.

For queries relating to appointments please call the Admissions Team on telephone numbers: 020 8725 4958 / 6042.
