

# Hand Exercises for Patients with Rheumatoid Arthritis

This leaflet provides information on hand exercises for patients with rheumatoid arthritis, who are under the care of the hand therapy team at St George's Hospital. If you have any further questions on the information in this leaflet, please speak directly to your therapist.

## Rheumatoid Arthritis and Exercise

Rheumatoid arthritis is a long-term condition that causes pain, swelling and stiffness in the joints. The symptoms usually affect the hands, feet and wrists. Fatigue is also a common symptom with rheumatoid arthritis.

Rheumatoid arthritis can affect many parts of the body differently. In the hand you may notice that some joints appear stiffer and more swollen. You may also notice that your symptoms fluctuate over the course of the day or even a week.

The following exercises are designed to help keep the joints in your fingers, thumb and wrist from getting stiff and may also improve the strength in your muscles. Your therapist will advise which exercises are going to be most useful for you.

Prior to starting your exercises, it is useful to warm up your hands, either by soaking your hands in a bowl of warm water or by using a heat pack. This can help reduce some of the stiffness in your joints and make it easier to do your exercises.

### Wrist Exercises

Gently rotate your wrist around in a circle. Stop and rotate in the opposite direction.

Gently lift your wrist up to the ceiling and lower it back down. Try to keep the movements slow and controlled.

## Finger Exercises

With fingers and knuckles straight, bend the middle and tip joints into a hook.

Bend knuckles and middle joints, whilst keeping the tip joints straight.

Bend all fingers into a full fist (if able).

Bend your knuckles as far as you can, while keeping the middle and tip joints straight. Slowly bring your fingers back out to straight.

Resting your palm on a flat surface, slide your thumb away from your palm. Walk your fingers **towards** your thumb, one at a time.

Spread your fingers and thumb apart and then gently bring them back together.

Do each exercise \_\_\_\_ times. Hold for \_\_\_\_ seconds

## Was this information helpful? Yes / No

Please let us know, contact [patient.information@stgeorges.nhs.uk](mailto:patient.information@stgeorges.nhs.uk) and include the leaflet title.

Thank you.

## Additional services

### Patient Advice and Liaison Service (PALS)

PALS can offer you advice and information when you have comments or concerns about our services or care. You can contact the PALS team on the advisory telephone line Monday, Tuesday, Thursday and Friday from 2pm to 5pm.

A Walk-in service is available:

Monday, Tuesday and Thursday between 10am and 4pm

Friday between 10am and 2pm.

The Walk-in and Advisory telephone services are closed on Wednesdays.  
Please contact PALS in advance to check if there are any changes to opening times.

PALS is based within the hospital in the ground floor main corridor between Grosvenor and Lanesborough wings.

**Tel:** 020 8725 2453 **Email:** [pals@stgeorges.nhs.uk](mailto:pals@stgeorges.nhs.uk)

### **NHS UK**

The NHS provides online information and guidance on all aspects of health and healthcare, to help you make decisions about your health.

**Web:** [www.nhs.uk](http://www.nhs.uk)

### **NHS 111**

You can call 111 when you need medical help fast but it's not a 999 emergency. NHS 111 is available 24 hours a day, 365 days a year. Calls are free from landlines and mobile phones.

**Tel:** 111

### **AccessAble**

You can download accessibility guides for all our services by searching 'St George's Hospital' on the AccessAble website ([www.accessable.co.uk](http://www.accessable.co.uk)). The guides are designed to ensure everyone – including those with accessibility needs – can access our hospital and community sites with confidence.
