

Finger Flexor Tendon Repair

Relative motion splinting after surgery

This leaflet is for patients who have had a flexor tendon repair to one of their fingers under the care of St George's Hospital. It explains what you can do to ensure the best possible recovery. If you have any further questions, please speak to the therapist caring for you.

What is Relative Motion Splinting?

The tendon(s) that you have had repaired enable you to bend your fingers. Relative motion splinting allows you to exercise the affected finger in a protective splint after repair. Exercising your finger is important for preventing stiffness and encouraging the tendons to glide after surgery. However, it is also very important that you do not over-exercise the finger, as this may damage the tendon repair.

Before you start

There are some additional instructions that you need to follow before beginning your exercises. These are concerned with looking after your **splint** and looking after your **wound**.

Looking after your splint

Two splints have been made to protect the surgical repair that you have undergone. It is important that you **wear both splints at all times** (even when sleeping) for four weeks after your operation. Do not remove the splints without the advice of your therapist.

You must wear the splint full time unti	
---	--

It is important that you do not get your splints hot or wet. Do not try to alter them in any way or take either of your splints off for any reason as this can increase the risk of damaging the repaired tendon.

Looking after your wound

Your wound will be left with minimal or no dressings to aid healing.

If your stitches need to be removed, this can be done either by a nurse at your GP surgery or in the Hand Unit, 10 to 14 days after surgery. If you are unsure, please ask your therapist.

To prevent infection, you must keep your wound clean and dry until it is healed.

Exercises

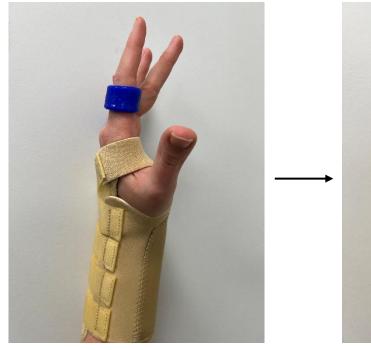

Please ensure you only exercise **as instructed by your therapist**. Do all exercises with **both splints on**:

1) Keeping the fingers straight, gently push the fingers into a 'hook' bend, one at a time.

 With the main knuckles bent forward, gently straighten the affected finger.

3) Gently try to straighten all the fingers and hold this for a few seconds. Then try to move all fingers into a bend and hold for a few seconds before restarting.

Please note that it is normal not to be able to make a full fist for the first four to six weeks after surgery.

How often should I do my exercises?

- Please complete each exercise____times.
- Hold each position for _____seconds.
- Repeat____times per day.

Additional information:

You can use your hand for very light activities weighing less than 1kg. Please see the table below for guidance.

LIGHT	
ACTIVITIES	
<1 Kg	
Personal	
Washing, shaving	
Fastening zips, buttons	
Putting on light clothes

General instructions:

- Only exercise as instructed by your therapist.
- You can use your hand for light functional tasks (maximum 1kg) <u>but</u> exclude your affected finger(s).
- **DO NOT** push your fingers straight with your other hand, apart from the exercises.
- DO NOT overuse your hand during exercises or light activities.
- **DO NOT** drive until eight weeks post-surgery.

Contact us

If you have any questions regarding the information provided in this leaflet, please feel free to discuss them with your therapist at your next appointment. For more urgent queries the team can be contacted on the **treatment** enquiries phone number listed below.

Your therapist's name is______ our provided by the state of the state

For more information leaflets on conditions, procedures, treatments and services offered at our hospitals, please visit www.stgeorges.nhs.uk

Was this information helpful? Yes / No

Please let us know, contact <u>patient.information@stgeorges.nhs.uk</u> and include the leaflet title.

Thank you.

Additional services

Patient Advice and Liaison Service (PALS)

PALS can offer you advice and information when you have comments or concerns about our services or care. You can contact the PALS team on the advisory telephone line Monday, Tuesday, Thursday and Friday from 2pm to 5pm.

A Walk-in service is available:

Monday, Tuesday and Thursday between 10am and 4pm Friday between 10am and 2pm.

The Walk-in and Advisory telephone services are closed on Wednesdays. Please contact PALS in advance to check if there are any changes to opening times.

PALS is based within the hospital in the ground floor main corridor between Grosvenor and Lanesborough wings.

Tel: 020 8725 2453 Email: pals@stgeorges.nhs.uk

NHS UK

The NHS provides online information and guidance on all aspects of health and healthcare, to help you make decisions about your health. Web: www.nhs.uk

NHS 111

You can call 111 when you need medical help fast but it's not a 999 emergency. NHS 111 is available 24 hours a day, 365 days a year. Calls are free from landlines and mobile phones. **Tel**: 111

AccessAble

You can download accessibility guides for all our services by searching 'St George's Hospital' on the AccessAble website (www.accessable.co.uk). The guides are designed to ensure everyone – including those with accessibility needs – can access our hospital and community sites with confidence.
