St George's University Hospitals NHS Foundation Trust

Could you tell us what information was provided to the IMG before their arrival in the UK?

Can you give further information on how you supported the IMGs in the delivery of the induction guidance, or what you are planning on doing to improve IMG induction at your trust?

We have IMG dedicated inductions every 6 months. This is also open to those who have not yet started clinical work. We have an IMG team who provide pastoral support and welcome them to the IMG forum. We have a welcome kit which gives information about the Trust, local area, facilities etc. They all have robust local induction. This is our 3rd year and have made significant progress in supporting these doctors.

Explain the practical support the Trust has arranged for IMGs None

Can you give further information on how you supported the IMGs in this category, or what you are planning on doing to improve IT use for IMGs?

They have an IT session including safe prescribing during their induction modules. Following this, they have access to all the on-line training modules and can use them as needed

Can you give further information on how you supported the IMGs in this category, or what you are planning on doing to improve language & communication for IMGs?

We have a Communication module run by our GAPs team & IMG team with each induction cycle. Access to other material is made available

Can you give further information on how you supported the IMGs in this category, or what you are planning on doing to improve Professional Medical Practice in the UK?

We have 8 IMG modules following the main induction. The modules cover what is needed to improve their medical practice in the UK

Can you give further information on how you supported the IMGs in this category, or what you are planning on doing to improve specialty related guidance on NHS processes/systems for IMGs?

Covered in Induction & modules. IMG forum provides further support. Local Induction for IMGs has been worked on and is robust in most areas
