

Nurse-Led Prolonged Jaundice Screening

The Blue Sky Centre

This leaflet explains about the Nurse-Led Prolonged Jaundice Screening service held in the Blue Sky Centre (Children's Ambulatory Unit), St George's Hospital. If you have any questions or concerns, please speak to a staff member caring for your baby.

What is Nurse-Led Prolonged Jaundice Screening?

This is an appointment only nurse-led service with paediatric consultant support held in The Blue Sky Centre (Children's Ambulatory) at St. George's Hospital. The aim is to streamline and improve the care of infants with prolonged neonatal jaundice and to prevent this cohort of patients from attending the Emergency Department.

Neonatal jaundice is a common presentation in infants, especially breastfed infants. Although the most likely diagnosis in infants with prolonged jaundice is breast milk jaundice, early investigations are crucial to rule out biliary atresia and other less urgent causes of jaundice.

Who can attend / receive the service?

Any health professional in the local area, e.g. community midwife, health visitor or GP, can refer the infant for nurse-led screening in The Blue Sky Centre upon recognising that an otherwise well infant is visibly jaundiced after 14 days of age (21 days if born before 37 completed weeks gestation). Infants must be referred by a health care professional before being reviewed in The Blue Sky Centre. We cannot accept referrals directly from parents.

If you have concerns about poor feeding, growth, abnormal stools as well as prolonged jaundice, these concerns can be discussed with The Blue Sky Centre paediatric consultant to determine the most appropriate time and place to assess the infant.

How do Health Professionals refer?

To refer an infant, Community midwifery teams to email referral form and send to BlueSkyCentre@stgeorges.nhs.uk The referrer will receive an email to inform them that an appointment has been given to the family

For other health professionals, (GP, Health visitor) contact the Blue Sky Centre directly on 020 8725 0650 / 0503, seven days a week from 8am to 6pm. A Blue Sky Nurse will then ask a series of questions including the baby's age, gestation and how the baby is being fed

and if they are gaining weight. Patient details including date of birth, gender, name at birth, NHS number are also required as well as a contact number of a parent. The unit is closed on bank holidays, the Easter weekend and on Christmas Day and Boxing Day.

Where do patients need to go?

Once the referral has been accepted by Blue Sky Centre staff, the family will be contacted by telephone within 72 hours and offered an appointment. Over the phone, Blue Sky staff will direct the family to where the unit is located within the hospital. It is not possible for the families to receive an appointment letter but a text can be sent if requested.

Does the family need to bring anything?

It is helpful if the family can bring the baby's red book and mother's maternity notes if she still has them.
